

I work 2 jobs and I like to sleep late on the weekends. I get calls at 8:00a.m. and all day even on Sunday. It has been peaceful to not have as many calls coming into my home when I am trying to rest. I still get some calls, usually from the Western States and when I tell them that it is illegal to call on Sundays, they tell me not where they are from. They are also do not speak english very well and half the time I can't understand them.
